

How Blockchain And Energy Monitors

Earlier this month, our smart energy monitor Smappee became the first datalogger to join forces with SolarCoin, a digital, blockchain-based currency that was created to support renewable energy. This is a significant step towards a future where consumers also become major producers of renewable energy and trade that energy directly with other consumers.

How blockchain and energy monitors will create the ...

In October, our smart energy monitor Smappee became the first datalogger to join forces with SolarCoin, a digital, blockchain-based currency that was created to support renewable energy. This is a significant step towards a future where consumers also become major producers of renewable energy and trade that energy directly with other consumers.

How blockchain and energy monitors will create the ...

Understand the disruptive potential of blockchain in the energy sector This online course studies the incredibly disruptive potential of blockchain technology in the energy sector. You will look at how blockchain works and start to understand the background, value proposition and geopolitical context that brought it to the center of everyone's attention.

Blockchain in the Energy Sector - Online Course

Energy Blockchain Monitor is the premier publication covering the intersection of blockchain technology and the energy industry. We connect the links between how this new technology will potentially disrupt and transform every area of the industry, from peer-to-peer energy trading to operations. Delivered to your email

Home | Energy Blockchain Monitor

With wholesale electricity distribution, the blockchain is used so energy consumers can buy and sell energy directly to the grid in real time (with technology like the "Smart Energy Agent" from Grid+ streamlining the entire process).

Blockchain And Energy: Everything You Need To Know.

By utilising Blockchain technology the energy industry could evolve into a more globally connected network of energy transfer, whereby everyday consumers would be an active player in energy suppliers via renewable energy initiatives and peer 2 peer networks.

Energy - Blockchain Technology - CCgroup

Energy-efficiency isn't the only obstacle in the path of a blockchain-based electricity network. Dutch peer-to-peer energy trading network PowerPeers runs its system using already-available ...
